ON/OFF DIMMER

touch dimmer

1.Quick touch: the lamp turns on at the first touch, while it turns off at the second touch
2.Long touch: the brightness gradually increases just by pressing the touch sensor for a long period; once reached the desired brightness, you can release the sensor touch. The light intensity will reach 100% degree by pressing the touch sensor for 4 seconds, and if you'll keep on pushing you'll notice that the brightness will gradually decrease until it will totally turns off.
3.While charging the sensor indicator will show a red light: once the charging will be complete, the sensor indicator will show a green light

WARNING

- Make sure that the products is installed properly before connecting to electricity.
- Do not cover the fitting.
